
INITIAL SITE ASSESSMENT

Firestone Boulevard Widening Project

Los Angeles County
City of Norwalk,
Los Angeles County, California

September 2019

STATE OF CALIFORNIA

CERTIFICATION

ESA has conducted this Phase I Initial Site Assessment in general accordance with the American Society for Testing and Materials (ASTM) Standard Practice E 1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, as applicable. This Phase I Initial Site Assessment was conducted for the following site:

- Firestone Boulevard Widening Project

ESA has reviewed all appropriate records and relevant data made available and conducted a visual site inspection of the project site. The information contained within this report is based on records and data made available and, to the best of ESA's knowledge, is correct and current as of August 2019. This Phase I Initial Site Assessment carries no warranty for any purpose.

CHAPTER 1

Executive Summary

This Executive Summary was compiled using excerpts from the Phase I Initial Site Assessment report that follows. This Executive Summary may not provide all the information necessary to fully characterize the site and gain an understanding of the issues nor does it detail the assessment and its findings. ESA does not recommend sole reliance on this Executive Summary.

This Phase I Initial Site Assessment (ISA) was prepared in general accordance with guidance from the American Society for Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13) for the Firestone Boulevard Widening Project (Project) see Figure 1, *Regional Location Map*, presents the regional location of the Project and Figure 2, *Study Area*, presents the location of the Project site).

The city of Norwalk (City) has identified the need to widen Firestone Boulevard between Hoxie Avenue/NB I-605 Freeway Ramps to the west and Imperial Highway to the east. The Firestone Boulevard Widening project would be located partially within the State's Right-of-way at the western limits with most of the project located within the city of Norwalk.

The existing Firestone Boulevard serves as a vital corridor to move goods and people, supporting the Norwalk economy. It provides a necessary link between the I-5 Freeway and the I-605 Freeway. Currently, this segment of Firestone Boulevard consists of 4-lanes of traffic (2 in each direction) and a landscaped raised median, in an urbanized area of the City with businesses on both sides of the road.

Previously, the cities of Norwalk and Downey, under a joint agreement, widened Firestone Boulevard to the west from the city of Downey limits to the I-605 Freeway ramps. LA Metro and Gateway Cities COG are currently planning the improvements to the I-605 Freeway/Firestone Boulevard interchange. This project has been identified as an early action project of the larger I-605 Freeway Improvements project.

The Firestone Boulevard Widening project would upgrade the existing section to be consistent with the wider section to the west and the planned 6-lane cross section under the I-605 freeway. This project widens the roadway east of the I-605 freeway for three (3) lanes in each direction including at an existing overpass of the Union Pacific Railroad (UPRR) line. The project will also provide multi-modal improvements with the installation of on-street (class II and class III) bicycle facilities. Other improvements that are part of the Firestone Boulevard Widening project include, but are not limited to, a bridge widening over a UPRR active line, traffic signal

improvements, retaining walls, pavement reconstruction, landscape and irrigation improvements, and pedestrian (ADA) improvements.

The project is anticipated to be constructed within existing City Right-of-way, except the westerly 200 feet of the Project's limits, which are located within the State's Right-of-Way.

SOURCE: Mapbox; ESA 2019.

Firestone Blvd Widening Project

Figure 2
Listed Facility Locations

1.1 Findings

A commercial database service provided relevant federal, state, and local regulatory lists for references to the parcels and listings within the appropriate ASTM Standard search distance for our review. Listings were evaluated with regard to the nature of potential chemicals of concern, the extent of known releases, and the physical setting of the study area (e.g., soil properties, geology, and seismicity). In general, reported or potential releases likely to affect a property would include those located on or within 1/8-mile radius of the parcels.

Regulatory agency websites were checked to provide additional information about the study area and adjacent properties. The following potential REC's were identified through the records review:

- The facility at 10966 Nance Street, Norwalk CA (Facility ID# 7) is located within the study area and is listed in the CLEANUPSITES and LUST databases. The site currently operates as a BMW automobile dealership. The site historically housed three USTs: one 550-gallon gasoline UST, one 10,000-gallon diesel UST, and one 350-gallon waste oil UST. The USTs were removed in March 2000, June 2003, and May 2004, respectively. Site assessment and remediation activities occurred following the removal of the three tanks. In June 2001, the Regional Water Quality Control Board (RWQCB) issued a closure letter for the 550-gallon UST. In August 2004, a closure report was drafted and submitted to the County of Los Angeles Department of Public Works for the 350-gallon UST and the 10,000-gallon UST. In July 2017, the case was referred to the RWQCB for further investigation and remediation. As of February 2018, the RWQCB lists the facility case as Open and remedial activities are ongoing. Due to the “open” status of the facility and its proximity to the study area, the property has the potential to be an REC to the study area.
- The facility at 11930 Studebaker Road, Norwalk CA (Facility ID# 17) is located within the study area and is listed in the ENVIROSTOR and RCRA909 databases. The site is currently occupied by a Walgreens Pharmacy and historically housed a dry-cleaning service. In 2003, the site was evaluated to have the potential for contaminated soil on the site due to historical operations as a dry cleaning operation. As of July 2005, the site is listed with a cleanup status of, “Inactive – Needs Evaluation” on the California Department of Toxic Substances Control’s (DTSC) EnviroStor database. Due to the “inactive – needs further evaluation” status for the site and its proximity to the study area, the property has the potential to be an REC to the study area.

Site reconnaissance was conducted on August 2, 2019. No additional RECs were identified through site reconnaissance activities. Although not considered RECs pursuant to ASTM E 1527-13, potential ACMs, LBP, and/or ADL are concerns that would be addressed with site-specific studies.

Compliance with existing federal and State regulations would ensure the reduced risk of release of hazardous building materials into the environment.

CHAPTER 2

Introduction

The project is regionally located within southern Los Angeles County (Figure 1, Regional Location). The project is located along Firestone Boulevard in the City of Norwalk (Figure 2, Vicinity Map). The project is located in Sections 11, 12, and 13, Township 3 South, Range 12 West, San Bernardino Meridian (USGS, 2019). Elevation at the project site ranges from approximately 103 to 113 feet above Average Mean Sea Level (AMSL).

The City has identified the need to widen Firestone Boulevard between Hoxie Avenue/NB I-605 Freeway Ramps to the west and Imperial Highway to the east. The Firestone Boulevard Widening project would be located partially within the State's Right-of-way at the western limits with most of the project located within the city of Norwalk.

The existing Firestone Boulevard serves as a vital corridor to move goods and people, supporting the Norwalk economy. It provides a necessary link between the I-5 Freeway and the I-605 Freeway. Currently, this segment of Firestone Boulevard consists of 4-lanes of traffic (2 in each direction) and a landscaped raised median, in an urbanized area of the City with businesses on both sides of the road.

Previously the cities of Norwalk and Downey, under a joint agreement, widened Firestone Boulevard to the west from the city of Downey limits to the I-605 Freeway ramps. LA Metro and Gateway Cities COG are currently planning the improvements to the I-605 Freeway/Firestone Boulevard interchange. This project has been identified as an early action project of the larger I-605 Freeway Improvements project.

The Firestone Boulevard Widening project would upgrade the existing section to be consistent with the wider section to the west and the planned 6-lane cross section under the I-605 freeway. This project widens the roadway east of the I-605 freeway for three (3) lanes in each direction including at an existing overpass of the Union Pacific Railroad (UPRR) line. The project will also provide multi-modal improvements with the installation of on-street (class II and class III) bicycle facilities. Other improvements that are part of the Firestone Boulevard Widening project include, but are not limited to, a bridge widening over a UPRR active line, traffic signal improvements, retaining walls, pavement reconstruction, landscape and irrigation improvements, and pedestrian (ADA) improvements.

2.1 Purpose, Standards, and Definitions

A Phase I Initial Site Assessment (ISA) was conducted for the Project site (see Figure 1, Regional Location Map and Figure 2, Study Area). The Project spans from Hoxie Avenue/NB I-605 Freeway Ramps to the west and Imperial Highway to the east in the City of Norwalk. The project

is located in Sections 11, 12, and 13, Township 3 South, Range 12 West, San Bernardino Meridian, in the State of California (USGS, 2019).

This ISA was conducted in general accordance with the American Society of Testing Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13) and the U.S. Environmental Protection Agency (USEPA) Final Rule regarding Standards and Practices for All Appropriate Inquiries as published in the Federal Register on November 1, 2005 (70 FR 66070) and codified at 40 CFR Part 312 (AAI Rule). The US EPA has stated that the newly revised ASTM E1527-13 is consistent with the AAI rule (78 FR 79319, December 30, 2013). Specifically, this final rule amends the AAI Rule at 40 CFR Part 312 to reference ASTM E1527-13 and make clear that persons conducting all appropriate inquiries may use the procedures included in this standard to comply with the AAI Rule.

The purpose of this ISA is to enable the parties relying on it to satisfy one or more of the requirements for the innocent landholder defense to liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and to evaluate the potential for Recognized Environmental Conditions (RECs) at the Project site. Three types of RECs are defined by the ASTM E1527-13, as listed below. The term Recognized Environmental Conditions (REC) means:

“The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.”

In addition, the updated ASTM E1527-13 defined the two additional categories cited below.

The term Historical Recognized Environmental Conditions (HREC) means:

“A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

For a past REC to be considered an HREC it must:

- Have already been remediated (or meet current standards without remediation);

- Not require use restrictions or engineering controls (e.g., cap, subslab depressurization system, etc.); and
- Meet current standards.

If the REC has use restrictions or engineering controls (e.g., cap, subslab depressurization system, etc.), then the REC may be designated as a Controlled Recognized Environmental Condition (CREC), as defined below. Unlike HRECs, a CREC will be listed in the conclusions section of the Phase I assessment, along with other RECs. The purpose of this new category is to bring continuing obligations such as use restrictions, maintenance requirements, reporting requirements, etc. to the forefront. The term CREC means:

“A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”

RECs, HRECs, and CRECs are not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

2.2 Scope of Services

This document contains the following sections:

Section 2, Introduction, includes a discussion of the purpose for performing the ISA; the standards and definitions used for the ISA; and the significant assumptions and limitations.

Section 3, Site Description, compiles information concerning the location, legal description, current and proposed use, a description of any structures and improvements at the time of the assessment, and adjoining property use for the parcel.

Section 4, Records Review, includes a review of various databases available from the federal, state, and local regulatory agencies regarding hazardous materials use, storage, or disposal at the parcels. Client-provided information is summarized and copies of relevant documents are included in the appendices of this report. Physical setting sources such as topography, soil, and groundwater conditions are described.

Section 5, *Site Reconnaissance*, describes observations during reconnaissance of the parcels. The methodology used and limiting conditions are described.

Section 6, *Interviews*, summarizes telephone and personal interviews conducted with the City of Norwalk.

Section 7, *Findings and Opinions*, presents the findings and professional opinions regarding the information contained in this report. It provides conclusions regarding the presence of RECs connected with the parcels and data gaps, if any, that could affect the recognition of RECs.

Section 8, *Report Authors and Qualifications*, provides the signatures and qualifications of the report authors.

Section 9, *References*, is a summary of the resources used to compile this report that are not already included in the Appendices.

The appendices contain certain pertinent documentation regarding the parcels: Appendix A contains the regulatory agency database search results report; Appendix B contains historical aerial photographs, topographic maps, and the oil and gas report; Appendix C contains the physical setting report and the water well report, and Appendix D contains the interview questionnaire.

2.3 Limitations and Exceptions

No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs, HRECs, and CRECs in connection with a property. Conformance of this Phase I assessment with ASTM E1527-13 reduces, but does not eliminate, uncertainty regarding the potential for RECs, HRECs, and CRECs in connection with the subject property. While every effort has been made to discover and interpret available historical and current information on the properties within the time available, some potential always remains for undiscovered contamination to be present. This report is a best-efforts collection and interpretation of available information, and cannot be considered wholly conclusive. This report and the associated work were provided in accordance with the principles and practices generally employed by the local environmental consulting profession. This is in lieu of all warranties, expressed or implied. No other warranty is expressed or implied. ASTM E1527-13 is included in this report by reference.

This ISA is based primarily on historical research, a database review, and a site reconnaissance of accessible areas. This ISA does not include “non-scope issues” as specified by ASTM E1527-13, such as surveys for the presence of the following items on or in the vicinity of the subject property: asbestos-containing materials (ACMs), poly-chlorinated biphenyls (PCBs), radon, indoor air quality, lead-based paint (LBP) analysis, lead in drinking water, industrial hygiene, health and safety, regulatory compliance, and high voltage lines.

The conclusions presented are professional opinions based solely upon indicated data described in this report, visual site and vicinity observations, and the interpretation of the available historical information and documents reviewed, as described in this report. Unless there is actual

knowledge to the contrary, information obtained from interviews or provided is assumed to be correct and complete. No liability would be assumed for information that was misrepresented by others or for items not visible, accessible, or present on the parcels during the time of the site reconnaissance. The conclusions are intended exclusively for the purpose outlined herein and the site location indicated. Any use or reuse of this document or the findings, conclusions, or recommendations presented herein is at the sole risk of the user.

Opinions and recommendations presented herein apply to the site conditions existing at the time of this ISA and cannot necessarily apply to unknown site changes that would not have been available to evaluate. Changes in the conditions of the parcels may occur with time due to natural processes or the works of man on the property or adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond assumed control. Opinions and judgments expressed herein are based on professional understanding and interpretation of current regulatory standards, and should not be construed as legal opinions.

CHAPTER 3

Site Description

3.1 General Setting and Location

Regionally, the subject portion of Firestone Boulevard is located within the northern portion of the City of Norwalk within the southern portion of the County of Los Angeles (see Figure 1, *Regional Location Map*). Locally, the Project spans from Hoxie Avenue/NB I-605 Freeway Ramps to the west and Imperial Highway to the east in the City of Norwalk (see Figure 2). The study area for the preparation of this report is defined as the Area of Direct Impact (ADI) and consists of the Project site and the adjacent parcels that would be affected by Project implementation. The elevation within the study area varies slightly. Representative viewpoints of the study area are depicted in Figure 3, *View Photographs of Study Area*. Utility lines run adjacent and parallel to the Firestone Boulevard study area where residential land uses are located and include several pole-mounted transformers as represented by the photograph in Figure 4, *Photographs Depicting the Existing Setting*. Additional photographs of the existing setting are provided in Figure 5, *Photographs Depicting the Existing Setting*.

3.2 Current and Proposed Land Uses

Current Land Uses

The southern end of Firestone Boulevard is at the junction of I-5 and Artesia Boulevard in the City of Buena Park. Firestone Boulevard then runs northwest through the Cities of Downey and South Gate, before ending in the City of Los Angeles.

The existing Firestone Boulevard serves as a vital corridor to move goods and people, supporting the Norwalk economy. It provides a necessary link between the I-5 Freeway and the I-605 Freeway. Currently, this segment of Firestone Boulevard consists of 4-lanes of traffic (2 in each direction) and a landscaped raised median, in an urbanized area of the City with businesses on both sides of the road.

Proposed Land Use

The Project site would continue to facilitate transportation uses.

Photographs Depicting the Existing Setting

CHAPTER 4

Records Review

The purpose of the records review is to obtain and examine records that could help to evaluate potential RECs, HRECs, and CRECs in connection with the ADI, or study area. This section documents the database records search, the evaluation of other records, summarizes information provided by the property owners, and describes the physical setting of the study area.

4.1 Standard Environmental Record Sources

Federal, state, and local regulatory agencies publish databases of businesses and properties that handle hazardous materials or hazardous waste, including those properties with a known release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. A commercial database service was contracted to perform the regulatory records database search for listings within the appropriate ASTM Standard minimum search distance (GeoSearch, 2019). The regulatory records database search sources are summarized on Table 1, *Regulatory Records Review Search Source*. A detailed description of the types of information contained in each of the databases reviewed and the agency responsible for compiling the data is included in the Radius Report provided as Appendix A. A list of acronyms for the individual databases is presented in the Database Summary of the Radius Report.

Listings were evaluated with regard to the nature of potential chemicals of concern, the extent of known releases, and the physical setting of the study area (e.g., soil properties, geology, and seismicity). In general, reported or potential releases likely to affect a property would include those located on, adjacent, or within 1/8-mile radius of the parcels. This analysis also considered additional factors such as chemical properties, regional knowledge of the site vicinity, anticipated groundwater flow direction, and available past regulatory documentation as part of the REC evaluation.

4.2 Results of Database Search

The study area was listed on thirteen federal, state, or local regulatory agency databases. Operating sites with no records of releases or use violations were not considered since they would not pose a risk to the study area. The following Table 1, *Regulatory Records Review Search Source*, summarizes the searched regulatory records. Sites located on, adjacent, or within 1/8-mile of the project site are summarized on Table 2, *Hazardous Materials Database Listings for Target, Adjacent, and Nearby Properties*.

**TABLE 2
HAZARDOUS MATERIALS DATABASE LISTINGS FOR TARGET, ADJACENT AND NEARBY PROPERTIES**

Listed Property/Addresses	Database(s)	Distance/ Direction from Project Site	Details	REC (Yes/No)	Explanation/Recommendation
2. 10970 Firestone Boulevard, Norwalk, CA 90650	CLEANUPSITES, HISTUST, LUST, SWEEPS, ERNSCA, RCRAGR09	Adjacent Property	The identified facility located at 10970 Firestone Boulevard, is located adjacent to the study area and is listed on the CLEANUPSITES, HISTUST, LUST, SWEEPS, ERNSCA, RCRAGR09. The site historically operated as a Shell Service Station and currently operates as A-Lux automotive repair shop (see Figure 6, <i>Potential Environmental Concerns</i>). Prior to the removal of the USTs in January 2001, there were three 10,000-gallon double-walled fiberglass USTs, one 550-gallon waste-oil UST, three dispenser islands and associated pumping at the site. In May 2007, the California RWQCB issued a case closure and no further action letter for the site.	No	Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.
5. 10850 Firestone Boulevard, Norwalk, CA 90650	ABST, CLEANUPSITES, HISTUST, LUST, ERNSCA, SWEEPS, RCRAGR09	Adjacent Property	The facility at 10850 Firestone Boulevard currently operates as an Audi automobile dealership. A leak was discovered stemming from an onsite UST in April 1998. Also in April 1998, the RWQCB issued a letter stating that all remediation activities had been completed and no further action was required.	No	Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.
6. 10965 Firestone Boulevard, Norwalk, CA 90650	CLEANUPSITES, HISTUST, LUST, SWEEPS	Adjacent Property	The facility at 10965 Firestone Boulevard, is located adjacent to the study area and is listed in the CLEANUPSITES, HISTUST, LUST, and SWEEPS databases. The site historically operated as an Exxon service station and currently operates as a 7-11 convenience store. A leak was discovered stemming from an onsite UST in January 1992. In May 1992, a site assessment was performed and in May 1995, the RWQCB issued a letter stating that all remediation activities had been completed and no further action was required.	No	Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.
7. 10966 Nance Street, Norwalk, CA 90650	CLEANUPSITES, LUST	Adjacent Property	The facility at 10966 Nance Street, is located adjacent to the study area and is listed in the CLEANUPSITES and LUST databases. The site currently operates as a BMW	Yes	Although closure reports were prepared and submitted in 2004 to the Los Angeles County

Listed Property/Addresses	Database(s)	Distance/ Direction from Project Site	Details	REC (Yes/No)	Explanation/Recommendation
			<p>automobile dealership. The site historically housed three USTs: one 550-gallon gasoline UST, one 10,000-gallon diesel UST, and one 350-gallon waste oil UST. The USTs were removed in March 2000, June 2003, and May 2004, respectively. Site assessment and remediation activities occurred following the removal of the three tanks. In June 2001 the RWQCB issued a closure letter for the 550-gallon UST. In August 2004, a closure report was drafted and submitted to the County of Los Angeles Department of Public Works for the 350-gallon UST and the 10,000-gallon UST. In July 2017, the case was referred to the RWQCB for further investigation and remediation. As of February 2018, the RWQCB lists the facility as Open and remedial activities are ongoing.</p>		<p>Department of Public Works, due to the “open” cleanup status for this property, it is recommended that additional investigation should be conducted. Furthermore, based on the nature of the case and potential to encounter contaminated soil and subsequent vapor migration, Caltrans Unknown Hazard Procedures should be implemented during project construction activities in the vicinity of this facility, if work in this area is proposed. Additionally, the resident engineer overseeing construction should have available field monitoring equipment to facilitate timely detection of hazardous conditions in the field.</p>
8. 11232 Firestone Boulevard, Norwalk, CA 90650	ABST, CLEANUPSITES, HISTUST, LUST, SWEEPS	Adjacent Property	<p>The facility at 11232 Firestone Boulevard is located adjacent to the study area and is listed in the ABST, CLEANUPSITES, HISTUST, LUST, and SWEEPS databases. The site currently operates as a construction equipment company and historically maintained three USTs on site: one 10,000-gallon motor vehicle fuel UST, one 6,000-gallon diesel fuel UST, and one 6,000-gallon waste oil UST. In August 1993, a leak was discovered and reported, stemming from one of the onsite USTs. In March 1995, the California RWQCB issued a closure letter for the site stating that no further remediation was required.</p>	No	<p>Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.</p>

Listed Property/Addresses	Database(s)	Distance/ Direction from Project Site	Details	REC (Yes/No)	Explanation/Recommendation
9. 11353 Imperial Highway East, Norwalk, CA, 90650	CLEANUPSITES , HISTUST, LUST, SWEEPS, CUPA	Adjacent Property	The facility at 11353 Imperial Highway East is located adjacent to study area and is listed in the CLEANUPSITES, HISTUST, LUST, SWEEPS, and CUPA databases. The site currently operates as a 76 Service Station and was historically occupied by a United Oil Service Station. In January 2002, United Oil removed three gasoline USTs, four fuel dispensers, and related piping. The USTs and product piping were removed in accordance with all applicable regulatory requirements. The three removed USTs were located in the same location as the current USTs and dispensers. Following removal, soil sampling took place and detected concentrations of total petroleum hydrocarbons (TPH), benzene, and/or methyl tert-butyl ether (MTBE). Remediation activities and subsequent sampling occurred until, in January 2016, the RWQCB issued a letter stating that all remediation activities had been completed and no further action was required.	No	Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.
12. 10700 East Firestone Boulevard, Norwalk, CA 90650	CLEANUPSITES , CWEEPS, RCRAGR09	0.12 miles West	The facility at 10700 East Firestone Boulevard, is known as Textron, Inc. Potential impacts occurred to groundwater during a release reported in March 1996, although limited information is provided. Case status is reported as closed and a no further action letter was issued by the RWQCB in December 1998.	No	Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.
17. 11930 Studebaker Road, Norwalk, CA 90650	ENVIROSTOR, RCRAGR09	Adjacent Property	The facility located at 11930 Studebaker Road, is listed in the ENVIROSTOR and RCRAGR09 databases. The site is currently occupied by a Walgreens Pharmacy and historically housed a dry-cleaning service. In 2003, the site was evaluated to have the potential for contaminated soil presence on the site due to historical operations as a dry cleaning operation. As of July 2005, the site is listed with a cleanup status of, "Inactive – Needs Evaluation" on the California Department of Toxic Substances Control's EnviroStor database.	Yes	Due to the inactive remediation activities on this property, it is recommended that additional investigation should be conducted. Furthermore, based on the nature of the case and potential to encounter contaminated soil and subsequent vapor migration, Caltrans Unknown Hazard Procedures should be

Listed Property/Addresses	Database(s)	Distance/ Direction from Project Site	Details	REC (Yes/No)	Explanation/Recommendation
32. 10635 and 10641 Firestone Boulevard, Norwalk, CA 90650	CLEANUPSITES, HISTUST, LUST, SWEEPS, CUPA, ERNSCA, RCRAGR09	0.09 miles West	The facility located at 10635 and 10641 Firestone Boulevard, is an active Chevron Service Station with three 12,000-gallon UST, one 1,000-gallon used-oil UST, four product dispensers, associated product piping, and a station building with three hydraulic hoists at the site. Historically, the site also housed three gasoline USTs (one 5,000-gallon tank and two 10,000-gallon tanks) and a 1,000-gallon waste oil UST, aligned parallel to East Firestone Boulevard. On September 19, 1990, Hallmark Petroleum removed four USTs from the Site: one 5,000-gallon and two 10,000-gallon gasoline USTs and one 1,000-gallon used oil UST, as well as associated product lines and dispensers. According to a summary provided by Alton Geoscience (Alton) in their 1991 Initial Site Characterization Report, TPH concentrations ranging from below method detection limits to 5,100 mg/kg were present in soil samples collected beneath the former gasoline USTs at depths ranging from 16 to 17 feet bgs. Soil samples collected beneath the former used oil tank at depths ranging from 7.5 feet to 11 feet bgs contained TRPH concentrations ranging from below method detection limits to 270 mg/kg. In December 1993, the Los Angeles County Department of Public Works issued a no further action closure letter for the site.	No	implemented during project construction activities in the vicinity of this facility, if work in this area is proposed. Additionally, the resident engineer overseeing construction should have available field monitoring equipment to facilitate timely detection of hazardous conditions in the field. Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.

Listed Property/Addresses	Database(s)	Distance/ Direction from Project Site	Details	REC (Yes/No)	Explanation/Recommendation
			<p>In November 1998, UST and dispenser upgrade activities were conducted at the site. Fourteen soil samples were collected from beneath the dispensers and product lines and analyzed for petroleum hydrocarbons. Two soil samples were collected from the soil stockpiles generated during dispenser upgrade activities. A TPH-g concentration of 1 mg/kg was present in one of the stockpile samples. Benzene was not detected in the soil samples collected; one soil sample had a methyl tert-butyl ether (MTBE) concentration of 0.18 mg/kg.</p> <p>On September 29, 2004, an LACDPW review letter was received by ConocoPhillips, requesting additional site assessment to delineate the extent of MTBE soil impacts. Delta submitted a soil vapor extraction (SVE) well installation report to the RWQCB in September 2008. Delta conducted an SVE pilot test in September 2008. Based on the results of the pilot testing, vapor mass removal rates for TPH-g were calculated at 15 pounds per day (lbs/day) for SVE-1 and 38 lbs/day for SVE-2. The radius of influence derived from the SVE step testing and extended testing was calculated at approximately 52 feet. Based on the relatively low vapor mass removal rates, SVE was not recommended as a remedial technology for the site. In addition, Delta recommended that no further action was necessary at the site. In November 2014, a well destruction letter was submitted to the RWQCB stating that remediation activities on the site had been completed and no further action was necessary. The RWQCB officially issued a closure and no further action letter for the site in December, 2014.</p>		
39. 10620 East Firestone Boulevard, Norwalk, CA 90650	CLEANUPSITES, ENVIROSTOR, HISTUST, CALSITES, SWEEPS,	0.12 miles West	The facility at 10620 East Firestone Boulevard previously operated as an Aerospace Engineering company and currently operates as a CVS Pharmacy, Starbucks, and Office Depot shopping center. The site historically operated and maintained one 5,000-gallon lubricating oil UST as	No	Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.

Listed Property/Addresses	Database(s)	Distance/ Direction from Project Site	Details	REC (Yes/No)	Explanation/Recommendation
	RCRAGR09, SEMSARCH		recorded in 1988. A report dated November 3, 1995, identified trichloroethene (TCE) up to 0.640 mg/kg in site soils. The report indicated that the sources of the volatile organic compounds (VOCs) were former site seepage pits and a former septic tank leach field. A single well point vapor extraction system was operated from December 30, 1994, to December 7, 1995. During this time two pounds of TCE were removed and two rebound tests indicated that continued operation of the vapor extraction system would recover a negligible amount of additional TCE. In July 1998, after completion of remediation activities, the California RWQCB issued a closure and no further action letter for the site.		
42. 12324 Hoxie Avenue, Norwalk, CA 90650	CLEANUPSITES, HISTUST, LUST, SWEEPS	0.12 miles South	The facility located at 12324 Hoxie Avenue is listed in the CLEANUPSITES, HISTUST, LUST, and SWEEPS databases. Potential impacts occurred to soil during a release reported in December 1999, although limited information is provided. Case status is reported as closed and a no further action letter was issued by the RWQCB in March 2003.	No	Due to the closure report issued for the facility, it is unlikely that this facility would pose a REC to the project site.

SOURCE: GeoSearch, 2019a

See Figure 2, Study Area, for locations of all listed records.

4.3 Other Records Reviewed

The State Water Resources Control Board (SWRCB) GeoTracker and the DTSC's EnviroStor websites were accessed to search for other possible site listings to update information from the Radius Report. No other sites within the search distances were identified. The regulatory agency records search also provides historical aerial photographs and historical topographic maps for review. The results of the review of these other records are discussed further below.

Historical Aerial Photographs. Historical aerial photographs are available for the years 1927, 1938, 1947, 1953, 1963, 1972, 1974, 1988, 1994, 2005, 2009, 2010, 2012, 2014, and 2016. These photographs are included in Appendix B of this report.

The **1927 aerial photograph** shows the study area as sparsely developed and does not depict Firestone Boulevard. The San Gabriel River is depicted traversing Firestone Boulevard to the west of the proposed study area. The map also shows a portion of the Southern Pacific railroad to the south of the proposed study area as well as an early version of the current road grid surrounding the study.

The **1938 aerial photograph** shows plots of agricultural land being developed with more commercial and residential uses. Otherwise, the corridor study location and surrounding locations appear as largely unchanged from the 1927 aerial photograph.

The **1947 aerial photograph** depicts further expansion and development of the road grid surrounding modern day Firestone Boulevard. Furthermore, plots of agricultural land have been developed with more commercial and residential uses. Otherwise, the parcels and surrounding areas remain unchanged in the 1947 aerial photograph.

The **1953 aerial photograph** shows the corridor study area and surrounding locations as experiencing large-scale development as suburban communities are seen in the areas surrounding current day Firestone Boulevard.

The **1963 aerial photograph** shows plots of agricultural land being developed with more commercial and residential uses. Otherwise, the corridor study location and surrounding locations appear as largely unchanged from the 1953 aerial photograph.

The **1972 and 1974 aerial photographs** show the corridor study area and surrounding locations as largely unchanged from the 1963 aerial photograph.

The corridor study area and surrounding locations remain largely unchanged in the 1988, 1994, 2005, 2009, 2010, 2012, 2014, and 2016 aerial photographs.

Historical Topographic Maps. Historical topographic maps are available for the years 1896, 1899, 1902, 1923, 1925, 1936, 1942, 1943, 1949, 1951, 1965, 1965 (Photorevised 1972), 1965 (Photorevised 1981), and 2012. These maps are included in Appendix B of this report.

The **1896 Downey, CA 1:5,208 topographic map** shows the study area as sparsely developed and does not depict Firestone Boulevard. The San Gabriel River is depicted traversing Firestone Boulevard to the west of the proposed study area. The map also shows a portion of the Southern Pacific railroad to the south of the proposed study area as well as an early version of the current road grid surrounding the study.

The **1899 and 1902 Downey, CA 1:5,208 topographic maps** show the Firestone Boulevard study area as being unchanged from the 1896 topographic map.

The **1923 Bell, CA; Whittier, CA; Clearwater, CA; and Arteria, CA 1:2,000 topographic map** continues not to depict Firestone Boulevard. The 1923 topographic map depicts the area region surrounding the study area as being partially developed with some commercial structures and a more robust road grid. Otherwise, the study area and surrounding locations appear unchanged from the 1902 topographic map.

The **1925 and 1936 Bell, CA; Whittier, CA; Clearwater, CA; and Arteria, CA 1:2,000 topographic maps** show the development of Firestone Boulevard as it extends southeast into the study area. Otherwise, the study area and surrounding locations appear unchanged from the 1923 topographic map.

The **1942 Downey, CA 1:5,208 topographic map** shows the completion of Firestone Boulevard through the study area and depicts a significant increase in development surrounding the proposed project site. Otherwise, the study area and surrounding locations appear unchanged from the 1936 topographic map.

The **1943 Downey, CA 1:5,208 topographic map** shows the Firestone Boulevard study area as being unchanged from the 1942 topographic map.

The **1949 Downey, CA 1:2,000 topographic map** shows the historic Delpert Airport located south of the study area and just east of the San Gabriel River. Otherwise, the study area and surrounding locations appear unchanged from the 1943 topographic map.

The **1951 Downey, CA 1:2,000 topographic map** shows the Firestone Boulevard study area as being unchanged from the 1942 topographic map.

The **1965 Downey, CA 1:2,000 topographic map** shows the Firestone Boulevard study area and surrounding area as significantly more developed and reflects the general development of the study area vicinity as it appears currently. The major transportation corridors such as the I-5 Freeway, the I-605 Freeway, and Imperial highway The Delpert Airport is no longer depicted in the 1965 topographic map.

The **1972 and 1981 Photorevised (1965) Downey, CA 1:2,000 topographic maps** show the Firestone Boulevard study area as being largely unchanged from the 1965 topographic map.

The **2012 Downey, CA 1:2,000 topographic map** depicts the road grid surrounding the study area as it appears now. Otherwise, the study area and vicinity appear to be unchanged from the 1981 Photorevised (1965) topographic map.

Oil and Gas Well Information. There is one oil or gas well located within the study area just north of Firestone Boulevard and immediately west of the railroad that bisects Ringwood Avenue and Graystone Avenue (DOGGR, 2019; GeoSearch, 2019b). However, this well is currently plugged and inactive. A leak stemming from the well's historical use could pose an REC to the study area. However, no obvious evidence of releases (e.g. heavily stained soils, pools of oil) were observed surrounding the location of the plugged well.

4.4 Physical Setting

The following sections provide information about the physical setting of the parcels obtained from published reports and maps, as referenced. Geotechnical information is not a required element of ASTM E1527-13 Phase I assessments, and is not included in this ISA.

Topography. The overall topographic relief is relatively flat across the entire study area. The study area elevation is about 108 feet above mean sea level.

Geology, Soils, and Hydrology. The site is on Quaternary alluvium and marine deposits from the San Gabriel Mountains. These rocks date from recent back to the Pliocene (up to 5.3 million years ago) (GeoSearch, 2019c).

The project site is located within the Peninsular Ranges Geomorphic Province of California, a well-defined physiographic unit that extends from the Transverse Ranges and the Los Angeles Basin on the north to the Mexican border and into Baja California on the south. The province is characterized by northwest trending mountain ranges and valleys, and structural geologic blocks bounded by similarly oriented faults and fault systems. The study area is located in the highly seismic Southern California region, within the influence of several fault systems that are considered to be active or sufficiently active and well-defined faults. The closest fault to the project is the buried Norwalk Fault located 0.15 miles east of the study area, which is a pre-quaternary fault (CGS, 2010).

The soil of the study area is comprised of San Emigdio fine sandy loam and Drained Hueneme sandy loam (USDA, 2019). These soil types are generally pervious to surface water and are not suitable for subsurface liquid retention. Surface flow is generally to the south. In the southern region of Los Angeles County, where the Project is located, the water table is generally more than 95 feet below the surface. Based on the depth of regional groundwater, shallow excavation activities associated with sound walls and lane widening are not likely to encounter groundwater.

Flood Zone Designation. According to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM) Map #06037C1830F, all portions of the study area are located in Zone X, a zone designated as being outside of the 100 year and 500 year floodplains. The San Gabriel River traverses Firestone Boulevard to the west of the I-605/Firestone Boulevard interchange – 0.25 miles west of the proposed study area – and is mapped as being in Zone AE

indicating the area is subject to inundation by the 1-percent-annual chance flood event (GeoSearch, 2019c).

4.5 Zoning and Land Use Designation

According to the City of Norwalk's General Plan Land Use Map, the affected study area is mainly zoned R1 (single family residential), R3 (multiple family high density residential), C1 (restricted commercial), C3 (general commercial), and M1 (light manufacturing), with some public land use areas. Furthermore, there are two parcels that are designated as Specific Plan Areas: Specific Plan Area No. 6 and Specific Plan Area No. 13. Specific Plan Area No. 6 is intended to provide for high density residential uses and Specific Plan Area No. 13 is intended to provide for general commercial, professional office, and/or hotel uses. Land use adjacent to the affected study area (as depicted in the site plan) include low density residential, neighborhood commercial, general commercial, and light industrial (City of Norwalk, 1996).

4.6 Environmental Reports for the Study Area

Asbestos-Containing Materials Study

The potential exists for buried asbestos containing cementitious pipe ("transite") to be present within the study area. Transite pipe(s) were commonly used for water transportation as part of historical agricultural practices. As per the South Coast Air Quality Management District Rule 1403, all structures scheduled for demolition/renovation are required to have an asbestos survey regardless of the type or age. All ACM must be removed by licensed asbestos abatement contractors or by trained and certified personnel using specific handling procedures. Although it is not considered a REC pursuant to ASTM E 1527-13, potential asbestos-containing materials (ACMs) in historic transite pipe(s) are a concern. To determine the exact nature of asbestos presence within the study area, testing is currently being performed to analyze the potential for ACM presence onsite. The ACM study will be prepared as a standalone technical report and would be under a separate cover after completion and review of this ISA.

Lead-Based Paint Study

Lane striping paint may contain lead-based paint (LBP) or other hazardous materials and may exceed the hazardous waste criteria under CCR Title 22 and require disposal in a Class 1 disposal site. Unlike Class 2 and 3 disposal sites, Class 1 disposal sites are approved to accept both hazardous and non-hazardous materials. Although it is not considered a REC pursuant to ASTM E 1527-13, potential LBP would be a concern if present.

Any structures acquired as part of the project, as well as the overpass that would be affected by the proposed project, should be analyzed for LBP. Specific procedures for handling building materials that may contain lead include, but are not limited to, lead abatement performed by contractors certified by the California Department of Public Health, review of assessment reports addressing the impact to lead-based materials, and transportation of lead-related waste under a Uniform Hazardous Waste Manifest. The LBP study will be prepared as a standalone technical report and would be under a separate cover after completion and review of this ISA.

Aerially Deposited Lead Study

In addition to LBP, aerially deposited lead (ADL) is common in the immediate vicinity of freeways and highways due to lead from gasoline engine emissions. To determine the exact nature of ADL presence on the Project site, testing is currently being prepared to analyze the potential for ADL presence and generation onsite. Specific procedures for handling building materials that may contain lead include, but are not limited to, lead abatement performed by contractors certified by the California Department of Public Health, review of assessment reports addressing the impact to lead-based materials, and transportation of lead-related waste under a Uniform Hazardous Waste Manifest. The ADL study will be prepared as a standalone technical report and would be under a separate cover after completion and review of this ISA.

CHAPTER 5

Site Reconnaissance

5.1 Methodology and Limiting Conditions

Aaron Weiner of ESA conducted the site reconnaissance on August 2, 2019, to assess present conditions. Weather at the time of the site inspection was sunny and warm. The site conditions discussed below are limited to readily apparent environmental conditions observed.

5.2 General Site Setting

Regionally, the subject portion of Firestone Boulevard is located within the northern portion of the City of Norwalk within the southern portion of the County of Los Angeles (see Figure 1, *Regional Location Map*). Locally, the Project extends from Hoxie Avenue/NB I-605 Freeway Ramps in the west to Imperial Highway in the east in the City of Norwalk (see Figure 2). The study area for the preparation of this report is defined as the Area of Direct Impact (ADI) and consists of the Project site and the adjacent parcels that would be affected by Project implementation. The topography within the study area is relatively flat. Utility lines run adjacent and parallel to the Firestone Boulevard study area where residential land uses are located and include several pole-mounted transformers. Representative viewpoints of the study area are depicted in Figure 3, *View Photographs of Study Area*.

The existing Firestone Boulevard extends approximately 12 miles from the City of South Gate to Interstate 5 in the City of Norwalk and serves as a vital corridor to move goods and people, supporting the Norwalk economy. It provides a necessary link between the I-5 Freeway and the I-605 Freeway. Currently, this segment of Firestone Boulevard consists of 4-lanes of traffic (2 in each direction) and a landscaped raised median, in an urbanized area of the City with businesses on both sides of the road. Multiple concrete drainage channels were observed on site (see Figures 4 and 5, *Photographs Depicting the Existing Setting*). Several warehouses were observed with loading bay and service dock areas. Multiple automobile dealerships and automotive repair shops are located along the study area portion of Firestone Boulevard. Additionally, high voltage power lines were observed in the vicinity of the site along with sewer and storm drains.

5.3 Site Observations

One of the concrete-lined culverts located at 11300 Firestone Boulevard, contained nonhazardous solid waste, and also depicted minor amounts of staining. However, since the drainage channel is lined with concrete and no evidence of cracks or faults were seen, it is unlikely that this condition would pose an REC to the study area.

Numerous vehicles – in varying condition and age – are stored on several properties adjacent to the study area (see Figure 6, *Potential Environmental Concerns*). It is possible that hazardous liquids associated with the operation and repair of these vehicles stored on the site – such as motor oil, paint thinners, gasoline, or other hazardous solvents – would leak, or spill.

- BMW Automobile Dealership located at 10966 Nance Street: The BMW automobile dealership maintains and stores approximately 100 vehicles onsite. Although it is possible that hazardous liquids associated with the operation, repair, and storage of these vehicles would leak or spill, the vehicles are stored on a concrete surface with no apparent cracks or faults. Therefore, there is no potential for subsurface soil, or groundwater intrusion by hazardous liquids at this site, and the property would not pose an REC to the study area.
- McKenna Pre-Owned Motors located at 10923 Firestone Boulevard: McKenna Pre-Owned Motors also maintains and stores approximately 100 vehicles onsite. Although it is possible that hazardous liquids associated with the operation, repair, and storage of these vehicles would leak or spill, the vehicles are stored on a concrete surface. The concrete surface appears to be in generally good condition with minor faults and cracks observed. Staining was observed, but was not seen in association with any of the mentioned cracks or faults. Therefore, it is unlikely that hazardous materials would infiltrate the subsurface, and the site would not pose an REC to the study area.
- A-Lux Automobile Repair located at 10970 Firestone Boulevard: A-Lux Automobile Repair currently operates as an automotive repair facility and stores approximately 50 vehicles onsite for maintenance and repair. Although it is possible that hazardous liquids associated with the operation, repair, and storage of these vehicles would leak or spill, the vehicles are stored on a concrete surface with no apparent cracks or faults. Therefore, there is no potential for subsurface soil, or groundwater intrusion by hazardous liquids at this site, and the property would not pose an REC to the study area.
- Hertz Car Sales located at 11301 Firestone Boulevard: Hertz Car Sales maintains and stores approximately 100 vehicles onsite. Although it is possible that hazardous liquids associated with the operation, repair, and storage of these vehicles would leak or spill, the vehicles are stored on a concrete surface with no apparent cracks or faults. Therefore, there is no potential for subsurface soil, or groundwater intrusion by hazardous liquids at this site, and the property would not pose an REC to the study area.

Indications of PCBs

Utility lines run adjacent and parallel to the Firestone Boulevard study area where residential land uses are located. Most of the utilities are underground. However, there was one observed pole mounted transformers located approximately 0.05 miles from the portion of the study area at 11251 Firestone Boulevard, which has the potential to contain PCBs (see Figure 4, *Photographs Depicting the Existing Setting*). If this pole-mounted transformer is disturbed during construction, the release of PCBs to the surrounding environment would potentially constitute an REC. However, no leaks or staining were observed from the identified transformer, and construction activities related to the proposed project would not relocate or disturb this identified transformer. Additionally, a “No-PCB” sticker was not observed on the transformer.

Indications of Solid Waste Disposal

Other than miscellaneous roadside refuse that had been discarded along the study area (see Figure 6, *Potential Environmental Concerns*), either intentionally or unintentionally (i.e., windblown), no significant accumulation of solid waste was observed at the study area during the site reconnaissance activities, with the exception of several small piles of solid waste. No dumping grounds were observed. Based on available information, no portion of the study area is currently or previously designated as a solid waste disposal site including adjacent sites.

Physical Setting Analysis, if Migrating Hazardous Substances Are an Issue

A limited number of sites and facilities within ASTM search distances from the study area have been identified in environmental databases. As discussed in Chapter 4, migrating hazardous substances were not identified as an issue for the study area.

Lead and Lead-Based Paint

During site reconnaissance activities, paint used for lane striping was observed along the roadways. As previously discussed in Section 4.6, lane striping paint may contain lead-based paint (LBP) or other hazardous materials and may exceed the hazardous waste criteria under CCR Title 22 and require disposal in a Class 1 disposal site, which are approved to accept both hazardous and non-hazardous materials.

Elevated concentrations of lead and other metals are sometimes associated with older roadways. However, no yellow traffic markings were observed along the roadway that may potentially contain hazardous levels of lead chromate. Although no yellow traffic markings were apparent during site reconnaissance, any structures acquired as part of the project, as well as the overpass that would be affected by the proposed project, should be analyzed for LBP, as discussed in Section 4.6. In addition to LBP, ADL is common in the immediate vicinity of freeways and highways due to lead from gasoline engine emissions, as discussed in Section 4.6. Landscaped areas are present near the various onramps and offramps.

PHOTOGRAPH 9: Photograph of representative solid waste that was observed adjacent and within the study area.

PHOTOGRAPH 10: Photograph of existing concrete-lined drainage channel with minor staining apparent.

PHOTOGRAPH 11: Photograph of vehicle storage operations at the property occupied by McKenna Motors BMW automobile dealership.

PHOTOGRAPH 12: Photograph of vehicle storage operations at the property occupied by McKenna Certified Pre-owned automobile dealership.

PHOTOGRAPH 13: Photograph of vehicle storage operations at the property occupied by A-Lux automobile repair.

PHOTOGRAPH 14: Photograph of vehicle storage operations at the property occupied by Hertz Car Sales automobile dealership.

SOURCE: ESA, 2019

Firestone Blvd Widening Project

Figure 6
Potential Environmental Concerns

5.4 Results of the Site Reconnaissance

No evidence of materials or equipment suggesting hazardous materials or waste, discolored soil or water due to chemical spills, stressed vegetation due to chemical spills, above ground or underground storage tanks, pits, ponds, septic systems, or lagoons were observed during the site reconnaissance. Additionally, if the results of the ACM, LBP, and ADL studies indicate the presence of one or more, of the evaluated contaminants, it would constitute an environmental concern for the Project location. However, as stated above, compliance with federal and State regulations would ensure the reduced risk of release of hazardous building materials into the environment.

CHAPTER 6

Interviews

A request for CUPA records from the County of Los Angeles Fire Department did not result in any identification of documents or reports associated with the study area, outside of those already included in the records review, above.

An interview questionnaire was sent to the project proponent in September, 2019.

CHAPTER 7

Findings and Opinions

7.1 Findings and Opinions

A commercial database service provided relevant federal, state, and local regulatory lists for references to the parcels and listings within the appropriate ASTM Standard search distance for our review. Listings were evaluated with regard to the nature of potential chemicals of concern, the extent of known releases, and the physical setting of the study area (e.g., soil properties, geology, and seismicity). In general, reported or potential releases likely to affect a property would include those located on or within 1/8-mile radius of the parcels.

Regulatory agency websites were checked to provide additional information about the study area and adjacent properties. The following potential REC's were identified through the records review:

- The facility at 10966 Nance Street, Norwalk CA (Facility ID# 7) is located within the study area and is listed in the CLEANUPSITES and LUST databases. The site currently operates as a BMW automobile dealership. The site historically housed three USTs: one 550-gallon gasoline UST, one 10,000-gallon diesel UST, and one 350-gallon waste oil UST. The USTs were removed in March 2000, June 2003, and May 2004, respectively. Site assessment and remediation activities occurred following the removal of the three tanks. In June 2001 the RWQCB issued a closure letter for the 550-gallon UST. In August 2004, a closure report was drafted and submitted to the County of Los Angeles Department of Public Works for the 350-gallon UST and the 10,000-gallon UST. In July 2017, the case was referred to the RWQCB for further investigation and remediation. As of February 2018 the RWQCB lists the facility as Open and remedial activities are ongoing. Due to the “open” status of the facility and its proximity to the study area, the property has the potential to be an REC to the study area.
- The facility at 11930 Studebaker Road, Norwalk CA (Facility ID# 17) is located within the study area and is listed in the ENVIROSTOR and RCRA GR09 databases. The site is currently occupied by a Walgreens Pharmacy and historically housed a dry-cleaning service. In 2003, the site was evaluated to have the potential for contaminated soil presence on the site due to historical operations as a dry cleaning operation. As of July 2005, the site is listed with a cleanup status of, “Inactive – Needs Evaluation” on the California Department of Toxic Substances Control’s EnviroStor database. Due to the “inactive – needs further evaluation” status for the site and its proximity to the study area, the property has the potential to be an REC to the study area.

Site reconnaissance was conducted on August 2, 2019. No additional RECs were identified through site reconnaissance activities. Although not considered RECs pursuant to ASTM E 1527-13, potential ACMs, LBP, and/or ADL are concerns that would be addressed with site-specific studies.

This Phase I environmental site assessment was completed in general conformance with the guidelines in ASTM E1527-13.

7.2 Data Gaps

An interview questionnaire was sent to the project proponent in July, 2019. To date, no response has been received and therefore, the absence of the questionnaire constitutes a data gap for this report. However, the data gap is not anticipated to affect the conclusions of this ISA. There were no other data gaps identified that could affect the identification of RECs, HRECs, or CRECs within the study area.

CHAPTER 8

Report Authors and Qualifications

8.1 Report Authors and Signatures

This section includes qualification statements of the environmental professionals responsible for conducting the ISA and preparing this report.

Ms. Arabesque Said-Abdelwahed, MPP, conducted the data review for the Project, supervised the site reconnaissance performed by Aaron Weiner, and prepared the ISA report. Ms. Said-Abdelwahed has over eight years of experience in environmental site investigations, characterizations, and assessments, including Phase I Environmental Site Assessments and Initial Site Assessments.

The work conducted and the report written by Ms. Said-Abdelwahed was reviewed by Mr. Michael Burns. Mr. Burns has over 30 years of experience in environmental site investigations, characterizations, and assessments, including Phase I Environmental Site Assessments and Initial Site Assessments.

Ms. Said-Abdelwahed declares that, to the best of her professional knowledge and belief, she meets the definition of Environmental Professional as defined in 40 CFR §312.10. Mr. Burns declares that, to the best of his professional knowledge and belief, he meets the definition of Environmental Professional as defined in 40 CFR §312.10.

Ms. Said-Abdelwahed has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of this property. With the assistance of Mr. Burns, she has developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Principal Analyst/Reviewer:

Arabesque Said-Abdelwahed, MPP

Senior Reviewer:

Michael G. Burns, PG #4532

Disclaimer

This report was designed by GeoSearch to meet or exceed the records search requirements of the All Appropriate Inquiries Rule (40 CFR Â§312.26) and the current version of the ASTM International E1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or, if applicable, the custom requirements requested by the entity that ordered this report. The records and databases of records used to compile this report were collected from various federal, state and local governmental entities. It is the goal of GeoSearch to meet or exceed the 40 CFRÂ§312.26 and E1527 requirements for updating records by using the best available technology. GeoSearch contacts the appropriate governmental entities on a recurring basis. Depending on the frequency with which a record source or database of records is updated by the governmental entity, the data used to prepare this report may be updated monthly, quarterly, semi-annually, or annually.

The information provided in this report was obtained from a variety of public sources. GeoSearch cannot ensure and makes no warranty or representation as to the accuracy, reliability, quality, errors occurring from data conversion or the customer's interpretation of this report. This report was made by GeoSearch for exclusive use by its clients only. Therefore, this report may not contain sufficient information for other purposes or parties. GeoSearch and its partners, employees, officers And independent contractors cannot be held liable For actual, incidental, consequential, special or exemplary damages suffered by a customer resulting directly or indirectly from any information provided by GeoSearch.

NOTIFIED: 4/10/2017

AGENCY: HAZMAT ONE

ADMINISTRATION: LACOFD HEALTH HAZ-MAT

INCIDENT LOCATION: 11100 FIRESTONE BLVD.
NORWALK, CA

INCIDENT COUNTY: LOS ANGELES COUNTY

SUBSTANCE INFORMATION

SUBSTANCE: PAINT RELATED MATERIAL

QUANTITY: 45

TYPE: UNSPECIFIED

INCIDENT DESCRIPTION

RP STATES THAT 45 GALLONS OF PAINT RELATED MATERIAL WAS RELEASED ONTO THE ASPHALT DUE TO HUMAN ERROR. THE RELEASED IS CONTAINED AND CLEANUP IS UNDERWAY BY A CONTRACTOR. NO WATERWAYS WERE IMPACTED

CONTAINED: YES

WATER INVOLVED / WATERWAY: NO / NOT REPORTED

DATE AND TIME: 4/10/2017

SITE: MERCHANT/BUSINESS

INJURIES: NO

FATALITIES: NO

EVACUATIONS: NO

CLEANUP BY: CONTRACTOR

NOTIFIED: 01/30/97
AGENCY: CENTRAL GARDEN & PET SUPPLY
ADMINISTRATION: NOT REPORTED
INCIDENT LOCATION: 11100 FIRESTONE AVENUE, HOMEBASE STORE
NORWALK, CA
INCIDENT COUNTY: LOS ANGELES

SUBSTANCE INFORMATION

SUBSTANCE: DIESEL
QUANTITY: 40
TYPE: GALS

INCIDENT DESCRIPTION

A TRACTOR PORTION OF A TRACTOR TRAILER RAN OVER A FIRE HYDRANT PUNCTURING GAS TANK.
CONTAINED: YES
WATER INVOLVED / WATERWAY: NO / NOT REPORTED
DATE AND TIME: 1/29/1997
SITE: ROAD
INJURIES: 0
FATALITIES: 0
EVACUATIONS: 0
CLEANUP BY: NOT REPORTED

NPL LISTED: NO RESTRICTED LAND USE: NO

SITE TYPE: EVALUATION

SITE TYPE DESCRIPTION

EVALUATION: IDENTIFIES SUSPECTED, BUT UNCONFIRMED, CONTAMINATED SITES THAT NEED OR HAVE GONE THROUGH AN INVESTIGATION AND ASSESSMENT PROCESS. IF A SITE IS FOUND TO HAVE CONFIRMED CONTAMINATION, IT WILL CHANGE FROM EVALUATION TO EITHER A STATE RESPONSE OR VOLUNTARY CLEANUP SITE TYPE. SITES FOUND TO HAVE NO CONTAMINATION AT THE COMPLETION OF THE INVESTIGATION AND ASSESSMENT PROCESS RESULT IN A NO ACTION REQUIRED (FOR PHASE 1 ASSESSMENTS) OR NO FURTHER ACTION (FOR PHASE 2 ASSESSMENTS) DETERMINATION.

DTSC's CURRENT INVOLVEMENT AT SITE (as of 04/24/2003)

REFER: 1248 LOCAL AGENCY -

INCIDENT INFORMATION

GSID#: 47059

NRC ID#: 47059

INCIDENT LOCATION: NOT REPORTED

INCIDENT ADDRESS: 10641 FIRESTONE AVE.
NORWALK, CA

INCIDENT COUNTY: LOS ANGELES

INCIDENT DETAILS

INCIDENT DATE: 11/8/1990 3:00:00 PM

INCIDENT CAUSE: OTHER

INCIDENT TYPE: FIXED

INCIDENT OCCURED/DISCOVERED: DISCOVERED

INCIDENT DESCRIPTION: CONTAMINATED SOIL DISCOVERED DURING ROUTINE TANK REPLACEMENT

RESPONSIBLE PARTY

RESPONSIBLE COMPANY: UNOCAL

ADDRESS: ADDRESS NOT REPORTED
CITY OF INDUSTRY CA 91748

RESPONSIBLE COMPANY ORGANIZATION TYPE: PRIVATE ENTERPRISE

MATERIALS INVOLVED

CHRIS CODE: GAT

MATERIAL REACHED WATER: YES

WATER AMOUNT: UNKNOWN AMOUNT / NOT REPORTED

MATERIAL RELEASED/AMOUNT: GASOLINE: AUTOMOTIVE (4.23G PB/G / UNKNOWN AMOUNT

OTHER MATERIALS INVOLVED

- NO OTHER MATERIALS INVOLVED -

REMEDIAL ACTION

REMEDIAL ACTION: EXCAVATED SOIL.

Below information was gathered from the prior NFRAP update completed in 10/2013 update:

<u>ACTION</u>	<u>START DATE</u>	<u>COMPLETION DATE</u>	<u>RESPONSIBILITY</u>
PA - PRELIMINARY ASSESSMENT	9/1/1986	6/1/1987	STATE (FUND)
DS - DISCOVERY	NOT REPORTED	9/1/1986	STATE (FUND)
PA - PRELIMINARY ASSESSMENT	NOT REPORTED	3/1/1988	EPA FUND
VS - ARCHIVE SITE	NOT REPORTED	3/1/1988	EPA IN-HOUSE

ACTION DESCRIPTIONS

PA - (PRELIMINARY ASSESSMENT) - COLLECTION OF DIVERSE EXISTING INFORMATION ABOUT THE SOURCE AND NATURE OF THE SITE HAZARD. IT IS EPA POLICY TO COMPLETE THE PRELIMINARY ASSESSMENT WITHIN ONE YEAR OF SITE DISCOVERY.

DS - (DISCOVERY) - THE PROCESS BY WHICH A POTENTIAL HAZARDOUS WASTE SITE IS BROUGHT TO THE ATTENTION OF THE EPA. THE PROCESS CAN OCCUR THROUGH THE USE OF SEVERAL MECHANISMS SUCH AS A PHONE CALL OR REFERRAL BY ANOTHER GOVERNMENT AGENCY.

PA - (PRELIMINARY ASSESSMENT) - COLLECTION OF DIVERSE EXISTING INFORMATION ABOUT THE SOURCE AND NATURE OF THE SITE HAZARD. IT IS EPA POLICY TO COMPLETE THE PRELIMINARY ASSESSMENT WITHIN ONE YEAR OF SITE DISCOVERY.

VS - (ARCHIVE SITE) - THE DECISION IS MADE THAT NO FURTHER ACTIVITY IS PLANNED AT THE SITE.

Unlocated Sites Summary

This list contains sites that could not be mapped due to limited or incomplete address information.

No Records Found

Environmental Records Definitions - FEDERAL

AIRSAFS Aerometric Information Retrieval System / Air Facility Subsystem

VERSION DATE: 10/20/14

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

BRS Biennial Reporting System

VERSION DATE: 12/31/15

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

CDL Clandestine Drug Laboratory Locations

VERSION DATE: 12/29/18

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

DOCKETS EPA Docket Data

VERSION DATE: 12/22/05

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

EC Federal Engineering Institutional Control Sites

VERSION DATE: 08/03/15

This database includes site locations where Engineering and/or Institutional Controls have been identified as part

Environmental Records Definitions - FEDERAL

of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination. The data included in this report was extracted from the final CERCLIS dataset (CERCLIS was a Superfund data system that EPA decommissioned in 2014 following its deployment of the Superfund Enterprise Management System), which represents program progress as of the end of fiscal year 2013.

ECHOR09 Enforcement and Compliance History Information

VERSION DATE: 03/09/19

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online (ECHO) database, provides compliance and enforcement information for facilities nationwide. This database includes facilities regulated as Clean Air Act stationary sources, Clean Water Act direct dischargers, Resource Conservation and Recovery Act hazardous waste handlers, Safe Drinking Water Act public water systems along with other data, such as Toxics Release Inventory releases.

ERNSCA Emergency Response Notification System

VERSION DATE: 04/07/19

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSCA Facility Registry System

VERSION DATE: 04/05/19

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR09 Hazardous Materials Incident Reporting System

VERSION DATE: 04/14/19

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

Environmental Records Definitions - FEDERAL

ICIS Integrated Compliance Information System (formerly DOCKETS)

VERSION DATE: 03/09/19

ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

ICISNPDES Integrated Compliance Information System National Pollutant Discharge Elimination System

VERSION DATE: 07/09/17

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. This database is provided by the U.S. Environmental Protection Agency.

LUCIS Land Use Control Information System

VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

MLTS Material Licensing Tracking System

VERSION DATE: 06/29/17

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements. Disclaimer: Due to agency regulations and policies, this database contains applicant/licensee location information which may or may not be related to the physical location per MLTS site.

NPDES09 National Pollutant Discharge Elimination System

VERSION DATE: 04/01/07

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. The NPDES database was collected from the U.S. Environmental Protection Agency (EPA) from December 2002 through April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data. This database includes permitted facilities located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

Environmental Records Definitions - FEDERAL

PADS PCB Activity Database System

VERSION DATE: 09/14/18

PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the U.S. Environmental Protection Agency of such activities.

PCSR09 Permit Compliance System

VERSION DATE: 08/01/12

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa. PCS has been modernized, and no longer exists. National Pollutant Discharge Elimination System (ICIS-NPDES) data can now be found in Integrated Compliance Information System (ICIS).

RCRASC RCRA Sites with Controls

VERSION DATE: 04/24/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with institutional controls in place.

SEMSLIENS SEMS Lien on Property

VERSION DATE: 08/13/18

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs. This is a listing of SEMS sites with a lien on the property.

SFLIENS CERCLIS Liens

VERSION DATE: 06/08/12

Environmental Records Definitions - FEDERAL

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete. Please refer to the SEMSLIENS database as source of current data.

SSTS Section Seven Tracking System

VERSION DATE: 02/01/17

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

TRI Toxics Release Inventory

VERSION DATE: 12/31/16

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal and tribal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

TSCA Toxic Substance Control Act Inventory

VERSION DATE: 12/31/12

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

RCRAGR09 Resource Conservation & Recovery Act - Generator

VERSION DATE: 04/01/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers

Environmental Records Definitions - FEDERAL

to facilities currently generating hazardous waste. EPA Region 9 includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

RCRANGR09

Resource Conservation & Recovery Act - Non-Generator

VERSION DATE: 04/01/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities classified as non-generators. Non-Generators do not presently generate hazardous waste. EPA Region 9 includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

ALTFUELS

Alternative Fueling Stations

VERSION DATE: 03/01/19

Nationwide list of alternative fueling stations made available by the U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Bio-diesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE).

FEMAUST

FEMA Owned Storage Tanks

VERSION DATE: 12/01/16

This is a listing of FEMA owned underground and aboveground storage tank sites. For security reasons, address information is not released to the public according to the U.S. Department of Homeland Security.

HISTPST

Historical Gas Stations

VERSION DATE: NR

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

ICISCLEANERS

Integrated Compliance Information System Drycleaners

VERSION DATE: 03/09/19

This is a listing of drycleaner facilities from the Integrated Compliance Information System (ICIS). The U.S. Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Environmental Records Definitions - FEDERAL

MRDS Mineral Resource Data System

VERSION DATE: 03/15/16

MRDS (Mineral Resource Data System) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS.

MSHA Mine Safety and Health Administration Master Index File

VERSION DATE: 03/15/19

The Mine dataset lists all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970. It includes such information as the current status of each mine (Active, Abandoned, NonProducing, etc.), the current owner and operating company, commodity codes and physical attributes of the mine. Mine ID is the unique key for this data. This information is provided by the United States Department of Labor - Mine Safety and Health Administration (MSHA).

BF Brownfields Management System

VERSION DATE: 03/31/19

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. The United States Environmental Protection Agency maintains this database to track activities in the various brown field grant programs including grantee assessment, site cleanup and site redevelopment. This database included tribal brownfield sites.

DNPL Delisted National Priorities List

VERSION DATE: 06/11/19

This database includes sites from the United States Environmental Protection Agency's Final National Priorities List (NPL) where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL, and final publication in the Federal Register has occurred.

NLRRCRAT No Longer Regulated RCRA Non-CORRACTS TSD Facilities

VERSION DATE: 04/01/19

This database includes RCRA Non-Corrective Action TSD facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements. This listing includes facilities that formerly treated, stored or disposed of hazardous waste.

Environmental Records Definitions - FEDERAL

ODI Open Dump Inventory

VERSION DATE: 06/01/85

The open dump inventory was published by the United States Environmental Protection Agency. An "open dump" is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

RCRAT Resource Conservation & Recovery Act - Non-CORRACTS Treatment, Storage & Disposal Facilities

VERSION DATE: 04/01/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities recognized as hazardous waste treatment, storage, and disposal sites (TSD).

SEMS Superfund Enterprise Management System

VERSION DATE: 06/11/19

The U.S. Environmental Protection Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs.

SEMSARCH Superfund Enterprise Management System Archived Site Inventory

VERSION DATE: 06/11/19

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System Archived Site Inventory (List 8R Archived) replaced the CERCLIS NFRAP reporting system in 2015. This listing reflects sites at which the EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program.

SMCRA Surface Mining Control and Reclamation Act Sites

VERSION DATE: 03/19/19

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type,

Environmental Records Definitions - FEDERAL

and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

USUMTRCA Uranium Mill Tailings Radiation Control Act Sites

VERSION DATE: 03/04/17

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

DOD Department of Defense Sites

VERSION DATE: 12/01/14

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

FUDS Formerly Used Defense Sites

VERSION DATE: 06/01/15

The Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available. **DISCLAIMER:** This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

FUSRAP Formerly Utilized Sites Remedial Action Program

VERSION DATE: 03/04/17

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Environmental Records Definitions - FEDERAL

NLRRCRAC No Longer Regulated RCRA Corrective Action Facilities

VERSION DATE: 04/01/19

This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NMS Former Military Nike Missile Sites

VERSION DATE: 12/01/84

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

NPL National Priorities List

VERSION DATE: 06/11/19

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL Proposed National Priorities List

VERSION DATE: 06/11/19

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC Resource Conservation & Recovery Act - Corrective Action Facilities

VERSION DATE: 04/01/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems

Environmental Records Definitions - FEDERAL

that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with corrective action activity.

RCRASUBC Resource Conservation & Recovery Act - Subject to Corrective Action Facilities

VERSION DATE: 04/01/19

The Resource Conservation and Recovery Act (RCRA) gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities subject to corrective actions.

RODS Record of Decision System

VERSION DATE: 05/14/19

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.

Environmental Records Definitions - STATE (CA)

CDL Clandestine Drug Labs

VERSION DATE: 12/31/17

The California Department of Toxic Substance Control (DTSC) maintains this listing of illegal drug laboratories. DTSC maintains a limited cost-tracking database to manage and pay appropriate contractor invoices for removal costs. The data source is an expenditure report with the contractors' invoice information and the reported removal action locations. The reported location information may or may not include the actual location of the illegal drug lab for several reasons. First, DTSC receives the location information verbally from law enforcement or local environmental health officials in the initial request for emergency support. Second, DTSC does not verify the information received and does not perform "data cleaning" or other measures to ensure data quality. Third, the location information may not be the actual location of an illegal drug lab or any hazardous substance release to the environment. The initial report may have provided the location of the nearest identifiable address to an illegal drug lab or mobile lab or abandonment of illegal drug lab wastes, or a nearby meeting location for the contractor. Please note the DTSC does not guarantee the accuracy of the address or location information or the condition of the location listed. The listing of an address or location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the address or location either requires or does not require additional cleanup work or mitigation action.

CHMIRS California Hazardous Material Incident Report System

VERSION DATE: 05/15/19

The California Hazardous Material Incident Report System list is maintained by the California Governor's Office of Emergency Services (OES). This list contains all spills called in to the California OES Warning Center for a specific year since 1993.

DTSCDR DTSC Deed Restrictions

VERSION DATE: 04/03/19

The California Department of Toxic Substances Control (DTSC) maintains this list of sites with deed restrictions. According to the DTSC, restricted land use indicates whether the site or area within the site has an environmental restriction recorded and/or other institutional control preventing certain types of land use or activities. The land use restrictions listed under the site management requirements are only an abbreviated summary of the land use restrictions, and may not encompass all restrictions and notification requirements placed on a property. For complete land use restriction information please contact the DTSC to review associated Land Use Restriction documents.

EMI Emissions Inventory Data

VERSION DATE: 12/31/17

This list of Emissions Inventory Data is maintained by the California Environmental Protection Agency California Environmental Agency Air Resources Board. This list includes criteria pollutant data and toxic data. Please note gas stations, print shops, autobody shops, and dry cleaners are not included in this list.

Environmental Records Definitions - STATE (CA)

HWTS Hazardous Waste Tanner Summary

VERSION DATE: 12/31/17

The Hazardous Waste Tanner Summary is maintained by the California Department of Toxic Substances Control (DTSC). This list includes data extracted from the copies of hazardous waste manifests received each year by the DTSC.

LDS Land Disposal Sites

VERSION DATE: 04/09/19

This list of Land Disposal sites (Landfills) is a subset of the GeoTracker Cleanup Sites database, maintained by the California State Water Resources Control Board. Sites are queried from GeoTracker by case type = Land Disposal Site.

LIENS Recorded Environmental Cleanup Liens

VERSION DATE: 05/17/19

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

MCS Military Cleanup Sites

VERSION DATE: 04/09/19

This list of Military sites is a subset of the GeoTracker Cleanup Sites database maintained by the California State Water Resources Control Board. Sites are queried from GeoTracker by case type = Military Cleanup Sites. This list includes : Military UST sites; Military Privatized sites; and Military Cleanup sites (formerly known as DoD non UST).

NPDES National Pollutant Discharge Elimination System Facilities

VERSION DATE: 06/02/19

This list of active, historical, and terminated National Pollutant Discharge Elimination System Facilities permits is maintained by the California Environmental Protection Agency State Water Resources Control Board. This data includes storm water general permit enrollees that are active or have been active within the past three years. Please note there can be multiple listings for a single permit due to multiple dischargers, multiple facilities, and/or multiple address listings. Please use the Regulatory Measure ID to identify duplicates, as this is a unique identifier for each permit.

ABST Above Ground Storage Tanks

VERSION DATE: 06/09/19

Environmental Records Definitions - STATE (CA)

This database, provided by the California Environmental Protection Agency's (CalEPA) Regulated Site Portal, contains aboveground petroleum storage tank facilities originating from the California Environmental Reporting System (CERS). These facilities store petroleum in aboveground storage tanks with oversight by local agencies. As of January 1, 2008, Assembly Bill No. 1130 of the Aboveground Petroleum Storage Act (APSA) authorized the Certified Unified Program Agencies to implement and administer the requirements of the APSA. CalEPA Data Disclaimer: Information displayed in the portal is collected from separate agency databases and displayed unaltered. Information that is considered confidential, trade secret, or is otherwise protected by the agency that manages the database is not loaded into the portal. For more detail about information displayed in the portal, please visit the data source sites. Please refer to AST2007 database for aboveground storage tank information obtained from the California State Water Resources Control Board prior to 2008 APSA requirements.

AST2007 Aboveground Storage Tanks Prior to January 2008

VERSION DATE: 12/01/07

This database contains aboveground storage tank facilities registered with the California State Water Resources Control Board (SWRCB) between 2007 and 2003. Since 2006, tanks were required to contain a minimum (even as cumulative) of 1320 gallons to be in the program. As of January 1, 2008, the SWRCB no longer maintains a list of registered aboveground storage tanks, due to effective Assembly Bill No. 1130 (Laird) of the Aboveground Petroleum Storage Act (APSA). This Bill authorized the Certified Unified Program Agencies to implement and administer the requirements of the APSA. Please refer to ABST database as a current source for aboveground petroleum storage tank data.

CLEANER Dry Cleaner Facilities

VERSION DATE: 06/13/19

This list of dry cleaners is maintained by the California Department of Toxic Substances Control (DTSC). Data is extracted from the DTSC Hazardous Waste Tracking System. This list includes dry cleaner facilities that have registered EPA identification numbers. These facilities are categorized by SIC codes (7211, 7212, 7213, 7215, 7216, 7217, 7218, 7219). This database may also include facilities other than dry cleaners who also register with these same NAICS Codes. Not all companies report their NAICS/SIC Codes to the DTSC, therefore this database may exclude registered dry cleaner facilities with incomplete classification information.

DTSCHWT DTSC Registered Hazardous Waste Transporters

VERSION DATE: 04/30/19

The California Department of Toxic Substances Control maintains this list of Registered Hazardous Waste Transporters.

HISTUST Historical Underground Storage Tanks

VERSION DATE: 12/31/87

The Hazardous Substance Storage Container Database is a historical list of Underground Storage Tank sites,

Environmental Records Definitions - STATE (CA)

compiled from tank survey and registration information collected at one time between 1984 and 1987 by the State Water Resources Control Board. The hazardous substances stored within these tanks includes, but not restricted to, petroleum products, industrial solvents, and other materials.

MINES Mines Listing

VERSION DATE: 04/24/19

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data.

MWMP California Medical Waste Management Program Facility List

VERSION DATE: 05/02/19

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

SLIC Spills, Leaks, Investigation & Cleanup Recovery Listing

VERSION DATE: 06/16/08

These records are maintained by the California Regional Water Quality Control Board (RWQCB). This list includes contaminated sites that impact groundwater or have the potential to impact ground water. Please refer to CLEANUPSITES database as source of current data.

SWEEPS Statewide Environmental Evaluation and Planning System

VERSION DATE: 10/01/94

The Statewide Environmental Evaluation and Planning System (SWEEPS) contains a historical listing of active and inactive underground storage tank locations from the State Water Resources Control Board. The hazardous substances stored within these tanks includes, but not restricted to, petroleum products, industrial solvents, and other materials. Refer to CUPA listing for source of current data.

USTCUPA Underground Storage Tanks

VERSION DATE: 04/16/19

The California State Water Resources Control Board maintains this list of permitted underground storage tanks. Permitted Underground Storage Tank (UST) Facilities includes facilities at which the owner or operator has been issued a permit to operate one or more USTs by the local permitting agency. Permitted UST Facilities are

Environmental Records Definitions - STATE (CA)

imported weekly from the California Environmental Reporting System (CERS).

BF Brownfield Sites

VERSION DATE: 05/27/19

This database of Brownfield Memorandum of Agreement (MOA) sites is maintained by the California Environmental Protection Agency. The California Department of Toxic Substances Control (CTSC), the State Water Resources Control Board, and the Regional Water Quality Control Boards (RWQCBs) agreed to a Brownfield Memorandum of Agreement (MOA). The MOA limits the oversight of a brownfields site to one agency, establishes procedures and guidelines for identifying the lead agency, calls for a single uniform site assessment procedure, requires all cleanups to address the requirements of the agencies, defines roles and responsibilities, provides for ample opportunity for public involvement, commits agencies to review time frames, and commits agencies to coordinate and communicate on brownfields issues. The Brownfield MOA site list is obtained from the State Water Resources Control Board GeoTracker online database. This list contains both open and completed sites.

CALSITES CALSITES Database

VERSION DATE: 05/01/04

This historical database was maintained by the Department of Toxic Substance Control for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

CLEANUPSITES GeoTracker Cleanup Sites

VERSION DATE: 04/09/19

This list of GeoTracker Cleanup Sites is maintained by the California State Water Resources Control Board. The database contains contaminated sites that impact groundwater or have the potential to impact ground water, including sites that require cleanup, such as Leaking Underground Storage Tank Sites, Department of Defense Sites, and Cleanup Program Sites. GeoTracker also contains records for various unregulated projects as well as permitted facilities including: Irrigated Lands, Oil and Gas production, operating Permitted USTs, and Land Disposal Sites. GeoTracker portals retrieve records and view integrated data sets from multiple State Water Board programs and other agencies.

CORTESE Cortese List

VERSION DATE: 04/15/19

This list of hazardous waste and substances sites (Cortese List) is maintained by the California Department of Toxic Substances Control (DTSC). The list, or a site's presence on the list, has bearing on the local permitting process as well as on compliance with the California Environmental Quality Act (CEQA). Because this statute was enacted over twenty years ago, some of the provisions refer to agency activities that were conducted many years ago and are no longer being implemented and, in some cases, the information to be included in the Cortese List does not exist.

Environmental Records Definitions - STATE (CA)

DROP Listing of Certified Dropoff, Collection, and Community Service Programs

VERSION DATE: 04/09/19

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

ERAP Expedited Removal Action Program Sites

VERSION DATE: 04/12/19

This list of Expedited Removal Action Program Sites is a subset of the EnviroStor database, maintained by the California Department of the Toxic Substance Control. Sites are queried from Envirostor by site type = State Response ERAP.

HISTCORTESE Historical Cortese List

VERSION DATE: 11/02/02

This historical listing includes hazardous waste and substances sites designated by the State Water Resources Control Board, the Integrated Waste Board, and the Department of Toxic Substance Control. The Cortese List was utilized by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. See CACORTESE for an updated version of this database.

LUST Leaking Underground Storage Tanks

VERSION DATE: 04/09/19

This list of leaking underground storage tanks is a subset of the GeoTracker Cleanup Sites database maintained by the California State Water Resources Control Board. Sites are queried from GeoTracker by case type = LUST Cleanup Site.

NFA No Further Action Determination

VERSION DATE: 06/10/19

This list of No Further Action sites is maintained by the California Department of Toxic Substances Control. This data is queried from the Department of Toxic Substances Control Envirostor online database.

NFE Sites Needing Further Evaluation

VERSION DATE: 06/10/19

This list of Inactive - Needs Evaluation sites is maintained by the California Department of Toxic Substances Control. These are unconfirmed contaminated properties that need further assessment. This data is queried from

Environmental Records Definitions - STATE (CA)

the Department of Toxic Substances Control Envirostor online database.

PROC Listing of Certified Processors

VERSION DATE: 05/08/19

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

REF Referred to Another Local or State Agency

VERSION DATE: 06/11/19

This Referred to Another Local or State Agency list, maintained by the California Department of Toxic Substances Control (DTSC), contains properties where contamination has not been confirmed and which were determined as not requiring direct Department of Toxic Substance Control Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency. This data is extracted from the DTSC Envirostor online database and is queried by Status = "Refer state and local agencies".

SWIS Solid Waste Information System Sites

VERSION DATE: 04/03/19

This list of Solid Waste Information System Sites is extracted from the Solid Waste Information System (SWIS) database, maintained by the California Department of Resources Recycling and Recovery. The SWIS database includes information on solid waste facilities, operations, and disposal sites located in California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

SWRCY Recycling Centers

VERSION DATE: 05/09/19

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

VCP Voluntary Cleanup Program

VERSION DATE: 04/12/19

This list of Voluntary Cleanup Sites is a subset of the Envirostor database maintained by the California Department of Toxic Substance Control. Sites are queried from Envirostor by site type = Voluntary Cleanup.

WMUDS Waste Management Unit Database

VERSION DATE: 01/01/00

Environmental Records Definitions - STATE (CA)

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

ENVIROSTOR EnviroStor Cleanup Sites

VERSION DATE: 04/12/19

This list of Envirostor Cleanup Sites is maintained by the California Department of Toxic Substances Control (DTSC). DTSC has developed the EnviroStor database system to evaluate and track sites with confirmed or potential contamination and sites where further investigation may be necessary. This EnviroStor database of cleanup sites contains the following: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. Sites where DTSC has made a "No Action Required" determination are not included in this database, as these sites had assessments that revealed no evidence of recognized environmental conditions in connection with the property.

ENVIROSTORPCA EnviroStor Permitted and Corrective Action Sites

VERSION DATE: 04/16/19

The California Department of Toxic Substance Control maintains this list of Hazardous Waste sites in their Envirostor online database. This list contains: 1) data pertaining to the Hazardous Waste Sites tracked in Envirostor; 2) the completed activities for Hazardous Waste Units; 3) the completed activities for Hazardous Waste Units undergoing closure; 4) completed maintenance activities; 5) the various "aliases" for a project (Some examples are: alt project name, alt address, EPA ID, etc.).

TOXPITS Toxic Pits Cleanup Act Sites

VERSION DATE: 07/01/95

Toxic Pits are sites with possible contamination of hazardous substances where cleanup is necessary. This listing is no longer updated by the State Water Resources Control Board.

Environmental Records Definitions - LOCAL

LAFDHMS City of Los Angeles CUPA Hazardous Materials Sites

VERSION DATE: 01/01/19

The City of Los Angeles Fire Department provides this list of active and inactive hazardous material sites.

LAHMS Los Angeles County Hazardous Materials System

VERSION DATE: 02/16/06

The Los Angeles County Department of Public Works maintains this listing of Industrial Waste and Underground Storage Tank sites.

LASM Los Angeles County Site Mitigation List

VERSION DATE: 04/08/19

The Los Angeles County Site Mitigation List is maintained by the County of Los Angeles Fire Department.

LACCUPA Los Angeles County CUPA

VERSION DATE: 06/15/19

This list of Los Angeles County industrial waste and underground storage tank sites managed by the Los Angeles County Department of Public Works CUPA. Closed, permitted, remediated, and suspended permits are all included in this list.

LAFDAST City of Los Angeles CUPA Above Ground Petroleum Storage Tanks

VERSION DATE: 06/03/19

The City of Los Angeles Fire Department provides this list of active and inactive aboveground storage tanks.

LAFDUST City of Los Angeles CUPA Underground Storage Tanks

VERSION DATE: 06/03/19

The City of Los Angeles Fire Department maintains this list of active and inactive underground storage tanks.

WIP Well Investigations Program Case List

VERSION DATE: 07/01/09

The Well Investigations Case List for the San Gabriel and San Fernando Valley Cleanup Programs is maintained by the State Water Resources Control Board.

Environmental Records Definitions - LOCAL

LASWF Los Angeles County Solid Waste Facilities

VERSION DATE: 06/16/19

This list of Los Angeles County permitted solid waste sites, closed landfills, and historical dumpsites is maintained by the Los Angeles County Department of Public Works. Sites are extracted from the Solid Waste Information Management System (SWIMS) online database.

AOC San Gabriel Valley Areas of Concern

VERSION DATE: 01/01/06

A listing of the San Gabriel Valley Superfund Sites located in Los Angeles County with Volatile Organic Compound groundwater contamination.

Environmental Records Definitions - TRIBAL

USTR09 Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/10/18

This database, provided by the United States Environmental Protection Agency (EPA), contains underground storage tanks on Tribal lands located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

LUSTR09 Leaking Underground Storage Tanks On Tribal Lands

VERSION DATE: 10/10/18

This database, provided by the United States Environmental Protection Agency (EPA), contains leaking underground storage tanks on Tribal lands located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

ODINDIAN Open Dump Inventory on Tribal Lands

VERSION DATE: 11/08/06

This Indian Health Service database contains information about facilities and sites on tribal lands where solid waste is disposed of, which are not sanitary landfills or hazardous waste disposal facilities, and which meet the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944).

TORRESDUMPSITES Illegal Dump Sites on the Torres Martinez Reservation

VERSION DATE: 10/29/07

This listing of illegal dump site locations on the Torres Martinez Reservation is maintained by the United States Environmental Protection Agency, Region IX. These dump sites contain unlawfully discarded household waste such as landscaping and wood wastes with no known soil or groundwater contamination. A majority of the sites have already been cleaned up through the collaborative efforts of the EPA, The California Integrated Waste Management Board and the Torres Martinez Tribe.

INDIANRES Indian Reservations

VERSION DATE: 01/01/00

The Department of Interior and Bureau of Indian Affairs maintains this database that includes American Indian Reservations, off-reservation trust lands, public domain allotments, Alaska Native Regional Corporations and Recognized State Reservations.

FEMA Report

FEMA - Federal Emergency Management Agency

The National Flood Hazard Layer (NFHL) data used in this report is derived from the Federal Emergency Management Agency. The NFHL dataset is a compilation of effective Flood Insurance Rate Map (FIRM) databases (a collection of the digital data that are used in GIS systems for creating new Flood Insurance Rate Maps) and Letters of Map Change (Letters of Map Amendment and Letters of Map Revision only) that create a seamless GIS data layer for United States and its territories. The NFHL is updated as new study or LOMC data becomes effective. Note: Currently, not all areas have modernized FIRM database data available. As a result, users may need to refer to the effective Flood Insurance Rate Map for effective flood hazard information.

FEMA Flood Zone Definitions within Search Radius

AE	Zone AE
-----------	---------

Areas subject to inundation by the 1-percent-annual-chance flood event determined by detailed methods. BFEs are shown within these zones. (Zone AE is used on new and revised maps in place of Zones A1–A30.)

X	Zone X
----------	--------

An area that is determined to be outside the 100 and 500 year floodplains.

NWI Map

[Click here to access Satellite view](#)

NWI Report

NWI - National Wetlands Inventory

The US NWI digital data bundle is a set of records of wetlands location and classification as defined by the U.S. Fish & Wildlife Service. This dataset is one of a series available in 7.5 minute by 7.5 minute blocks containing ground planimetric coordinates of wetlands point, line, and area features and wetlands attributes. When completed, the series will provide coverage for all of the contiguous United States, Hawaii, Alaska, and U.S. protectorates in the Pacific and Caribbean. The digital data as well as the hardcopy maps that were used as the source for the digital data are produced and distributed by the U.S. Fish & Wildlife Service's National Wetlands Inventory project. Currently, this data is only available in select counties throughout the United States.

SOIL Report

Soil Surveys

The soil data used in this report is obtained from the Natural Resources Conservation Service (NRCS). The NRCS is the primary federal agency that works with private landowners to help them conserve, maintain and improve their natural resources. The soil survey contains information that can be applied in managing farms and ranches; in selecting sites for roads, ponds, buildings and other structures; and in determining the suitability of tracts of land for farming, industry and recreation. This data is available in select counties throughout the United States.

GEOLOGY Report

US GEOLOGY

THE GEOLOGY DATA USED IN THIS REPORT ORIGINATES FROM THE USGS. THE FIRST STAGE IN DEVELOPING STATE DATABASES FOR THE CONTERMINOUS UNITED STATES WAS TO ACQUIRE DIGITAL VERSIONS OF ALL EXISTING STATE GEOLOGIC MAPS. ALTHOUGH A SIGNIFICANT NUMBER OF DIGITAL STATE MAPS ALREADY EXISTED, A NUMBER OF STATES LACKED THEM. FOR THESE STATES NEW DIGITAL COMPILATIONS WERE PREPARED IN COOPERATION WITH STATE GEOLOGIC SURVEYS OR BY THE NSA (NATIONAL SURVEYS AND ANALYSIS) PROJECT. THESE NEW DIGITAL STATE GEOLOGIC MAPS AND DATABASES WERE CREATED BY DIGITIZING ALREADY EXISTING PRINTED MAPS, OR, IN A FEW CASES, BY MERGING EXISTING LARGER SCALE DIGITAL MAPS.

GEOLOGY Definitions within Search Radius

GEOLOGY SYMBOL: **Q**

UNIT NAME: **Quaternary alluvium and marine deposits**

UNIT AGE: **Pliocene to Holocene**

UNIT DESCRIPTION:

Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

ADDITIONAL UNIT INFORMATION:

ROCKTYPE/S: **alluvium; terrace; lake or marine deposit (non-glacial)**

Environmental Records Definitions - FEDERAL

NWIS

United States Geological Survey National Water Information System

VERSION DATE: 12/21/18

The U.S. Geological Survey (USGS) National Water Information System (NWIS) includes water inventory data originating from all 50 states, plus border and territorial sites, including data from as early as 1899. This database includes selected site types limited to Groundwater Sites and Spring Sites from the 1.5 million plus sites within NWIS. Surface-Water, Atmospheric, and Other Site types are excluded. Disclaimer: Water Data for the Nation is the USGS public web interface to much of the data stored and managed within NWIS. It is not, however, configured to present all NWIS data and users may need to contact local Water Science Centers to obtain some information. NWIS data is updated on a regularly scheduled basis, and current condition data is generally updated upon receipt at local Water Science Centers.

Environmental Records Definitions - STATE (CA)

DWRWELLS

California Department of Water Resources Water Wells

VERSION DATE: 06/07/19

The California Department of Water Resources (DWR) maintains this database of water wells, including California Statewide Groundwater Elevation Monitoring (CASGEM) program wells and Voluntary wells. In Late 2009 the State Legislature amended the Water Code with SBx7-6, which mandates a statewide groundwater elevation monitoring program to track seasonal and long-term trends in groundwater elevations in California's groundwater basins. To achieve that goal, the amendment requires collaboration between local monitoring entities and DWR to collect groundwater elevation data. In accordance with this amendment to the Water Code, DWR developed the CASGEM program.

Questionnaire**

INTERVIEW QUESTIONNAIRE
PHASE I ENVIRONMENTAL SITE ASSESSMENT
Compatible with ASTM Standard E 1527

Site Name: Firestone Boulevard Widening Project

Site Address: Firestone Boulevard from Hoxie Avenue to Imperial Highway, Norwalk, CA

Date:

Interviewer: Arabesque Said

Interviewee:

Site Association: _____

Years Associated: _____

Please answer the following questions to the best of your knowledge.

1. Was the property or adjoining property ever used for industrial purposes (e.g. manufacturing) or as a gas station, dry cleaners, waste treatment, processing facility, motor repair facility, photo lab, commercial printing facility, junkyard/disposal/recycling/ landfill? If yes, please list the activity, hazardous substances used, and approximate dates when the activity occurred.

Prior land use, hazardous substances used, and dates:

Prior owners, key site managers/operators, occupants and dates:

Existing or prior structures used for what purposes and duration:

2. Do any of the following documents exist for the site or any portion of the site? If so, can you provide a copy? The following may exist.

- Environmental site assessment reports
- Environmental compliance audit reports
- Environmental permits
- Underground Storage Tank registration
- Underground Injection System registration
- Material Safety Data Sheets
- Community Right-To-Know Plan
- Safety plans: preparedness and prevention plans; spill prevention; countermeasure; and control plans, etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area;
- Correspondence from any government agency relating to past or current violations of environmental laws with regard to the property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity and Use Limitations (AULs)

3. Have you ever observed evidence of or do you have prior knowledge of any of the following items being used, stored, discarded, dumped above grade, buried, or burned onsite? Circle all that apply and indicate amount and approximate dates.

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Above ground storage tank (AST)*			Size: Contents: Condition:
Automotive batteries			
Industrial batteries			
Pesticides (>5 gallon)			
Paints (> 5 gallon)			
Chemicals/Hazardous Substances (> 5 gallon liquid)			

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Chemicals/Hazardous Substances (dry sacks, containers, etc.)			
Industrial drums (typically 55 gallons)			Contents: Condition:
Transformer or other equipment that may contain PCBs (e.g. hydraulic equipment)*			Installation date:
Underground storage tank*			Size: Contents: Condition:
Unknown materials you suspect may be hazardous substances			Describe:

*Please provide records if available.

4. What method(s) is used to contain spills of hazardous waste?

5. What method(s) is used to dispose of hazardous waste?

6. Are there any permits for handling, use, storage, or disposal of hazardous waste?

7. Have you observed evidence of or have prior knowledge of the following onsite?

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Equipment Maintenance Areas			
Accidental spills or releases of chemicals or petroleum products			

MATERIAL	QUANTITY	DATE(S) OBSERVED	COMMENTS
Possible asbestos containing materials (e.g. pipe, building, etc.)			Describe material:
Fill dirt originating from an unknown or contaminated site?			Source:
Pits, ponds, or lagoons associated with waste treatment or waste disposal?			Location:
Stained soil or odiferous soil? (e.g. oily black)			Location:
Sumps or dry wells*			Size : Contents : Condition :
Vent pipes, fill pipes, access ways to a fill pipe protruding from the ground or adjacent to a structure onsite?			Location:
Heating and cooling systems (include fuel source)			Source:
Flooring, drains, walls that are stained or emitting a foul odor (do NOT include water damage)?			Location:

*Please provide records if available.

8. Is the property served by a private well or non-public water system? If so, please answer the following:

a. Was the well used for domestic (D), agricultural irrigation (I), or monitoring (M) purposes? Are the wells currently operational and if not, when were they last used? When was the well drilled? How deep is the well? What is the approximate discharge rate?

Well No.	Type	Operating?	Last Used	Date Drilled	Depth	Discharge Rate	Location
1-							
2-							

- b. Have the wells been sampled for contaminants that exceed applicable requirements for the designated use (e.g. Drinking Water Standards)? If so, please provide the dates and copies of well records.

- c. Has the well or water system been designated by any governmental environmental/health agency as contaminated?

9. Is there an oil/gas well or oil/gas vent located onsite? If so, please indicate the location. Please supply any documents available.

10. Is the property or has the property to your knowledge been previously served by a septic system? If so, please indicate the location of the tank and leach lines (if applicable) and list any hazardous materials disposed.

11. Does the property discharge waste water into a storm water sewer system or a sanitary sewer system onto or adjacent to the property? If so, please describe location, piping flow, quantity discharged, and water quality.

12. Do you have knowledge of the following with respect to the property? Circle and explain all that apply.

- a. Environmental clean-up, ongoing or pending.
- b. Environmental liens
- c. Governmental notifications regarding any possible past or present violations of environmental laws. Yes. Leaking gasoline tank from former tank in the area.
- d. Past, threatened, pending lawsuits or administrative proceedings relevant to a release of a hazardous substance or petroleum product, in, on, or from the property.

- e. Prior environmental assessment that indicated the presence of hazardous substances, petroleum hydrocarbons, contaminants, or recommended further assessment.
- f. Deed Restrictions
- g. Citizen complaints regarding activities onsite

AGRICULTURAL SITES:

13. What crops have been grown onsite, currently and in the past?

CROP	DATE	LOCATION

If crops are present or have been grown, please answer questions 14 through 16 below:

14. Have pesticides been applied to fields or other portions of the site? If so, please answer the following questions:

- a. List the names of pesticides (includes herbicides, fungicides, insecticides, rodenticide) used and dates applied.

PESTICIDE AND BRAND NAME	DATE	CROP OR ANIMAL USE

b. Have you been notified of any violation of environmental law with respect to application or storage of pesticides?

c. Location of pesticide mixing areas, if any (past or present)?

d. Method of pesticide application?

15. Have fertilizers been applied to the site? What type and method of application?

16. Are there any buried pipelines for irrigation or other purposes onsite? If so, what materials is the piping constructed of? Asbestos containing material, PVC, other? Describe the location of buried piping.

User Questionnaire

Only the client (“user”) needs to respond to the following questions:

17. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?
18. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
19. As the user of this Phase 1 ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
20. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
21. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
 - a) Do you know the past uses of the property?
 - b) Do you know of specific chemicals that are present or once were present at the property?
 - c) Do you know of spills or other chemical releases that have taken place at the property?
 - d) Do you know of any environmental cleanups that have taken place at the property?
22. As the user of this Phase 1 ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?
